(54) Title: UNITE HOLDER FOR ELECTRICAL EQUIPMENT, FOR EXAMPLE FOR A LAMP ASSEMBLY

(57) Abstract: A room lamp 50 to be mounted on an interior wall member of a car body panel includes a pair of function portions A and A connected together by a flexible flat cable FFC 52, and a design portion B attached to the function portions. A lamp unit holder 1 of a strap-like configuration includes a pair of re-taining portions 4 and 4 for respectively releasably retaining the function portions A and A, and an interconnecting portion 3 interconnecting the re-taining portions 4 and 4. When the room lamp 50 is to be mounted in a lamp-mounting window 31 formed in a roof trim 30, the lamp unit holder 1 holds the function portions A and A spaced a predetermined distance from each other by the retaining portions and the interconnecting portion. A bulb cover 2 for protecting a bulb 54 mounted on a housing 51 is formed at a distal end of each retaining portion 4 in juxtaposed relation thereto.
